

(a) Time-to-competence (partial broadcast): ours reach mission-competence fastest; most competitors never reach it

(b) Cumulative lost mission value = sum of (oracle - earned): ours leave the least value on the table

(c) New-asset readiness: a new robot becomes effective on unseen targets after a few engagements; a structure-free newcomer never does

(d) Resilience to attrition: confidence-directed CF keeps skill on the active set AND recent arrivals; structure-free collapses on newcomers
